

Industrial Boiler Plants #2 P-312

Industrial Boiler Plants for generation both Saturated and Superheated Steam for various Industrial purposes. Design and deliveries of Piping and Steelwork for e.g.

- Fuel System (Oil, N-Gas etc.)
- Feed Water System
- Water Treatment
- Condensate Collection System
- Flue Gas Ducting System
- Stacks
- Flue Gas Monitoring
- Steam
- Support Structures
- Platform and Access Ways
- Electrical Supply System
- Cable tray, Busbars etc.

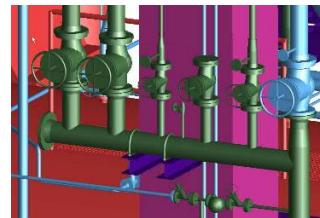

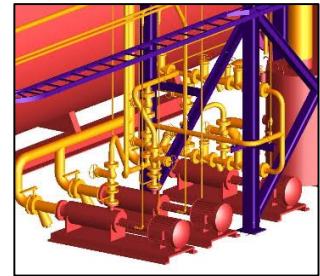

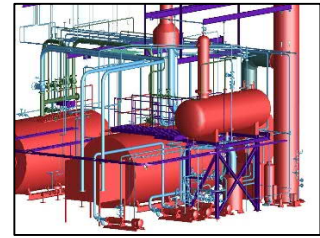

Design Package includes

- Piping acc. EN13480
- Vessels acc. EN13445
- Steel acc. Eurocode
- Platforms, Access Ways, Stairs acc. Eurocode/EN14122
- Stairs and Ladders
- Instrumentation
- Pumping Sizing and Selection
- Lighting Design
- Equi-potential Bonding

P-Engineering uses pre-fabrication facilities in e.g. Poland or Rumania for prefabrication of Pipe Spools, Support Steel and Equipment is sent out of Denmark. We can cooperate with all major suppliers of Industrial Steam Boilers.
