

Power Plants: Ash Transport

P-428

P-Engineering designs Pneumatic Ash Transportation System:

- Pressure Vessels – Ash Purge
- Transportation Pipes
- Pneumatic Air Supply

Purge Vessels:

Design of Pressure Vessel with Built-in Pneumatic Operated and fast-moving Dampers Up- and Downstream of Ash Container. Design according to either PED or ASME regulation and Standards.

Transportation Pipes:

General Arrangement and Detail Design of Transportation Pipes including Pipe Support. Design according to either PED or ASME regulation and Standards.

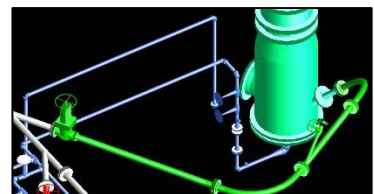

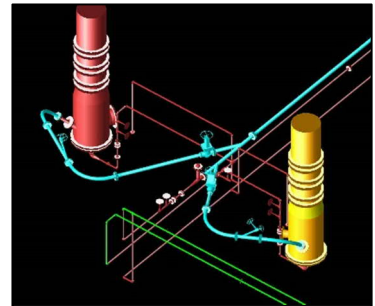

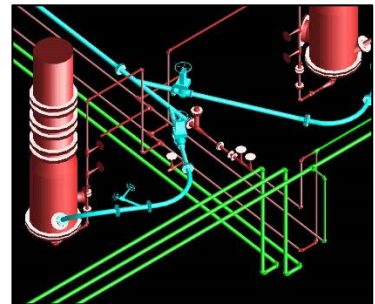

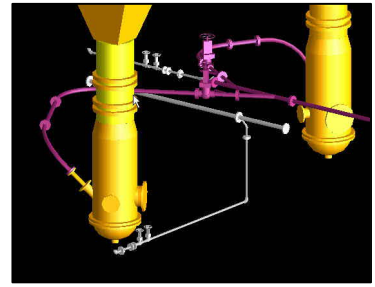

Deliveries:

- PID
- General and Detail Arrangement
- Site Measurements if needed
- Process Design, Calculations and Sizing
- Detail and manufacturing Drawing for Vessels
- Pipe Isometrics with BoQ for Piping Installation

Contact us for a quote for either a new installation or an upgrade / refurbishment of an existing Installation.
