Plantware

Databases – Standard or bespoken version – for General procurement operations during project execution.

Purchase Orders

Generation of purchase orders for both Goods and Services with information e.g., Incoterms, payment terms, invoicing procedures, delivery time and place, contact information for both Seller and Buyer etc.

Payment Tracing

Linking incoming invoices to corresponding Purchase Orders. All payments can be summarized and tracked against Purchase Orders.

Budget Tracking

Tracking actual expenses linked to specific company specific accounting numbers. The expenses can be both actual purchase prices and estimated values for e.g., orders based on unit price (Qty, m², m etc.)

Delivery Tracking

Enables delivery Tracking with entries for date of delivery and date of acceptance based on QC procedures for incoming goods.
