

Database: Room Specification P-631

Databases – Standard or bespoke version – for Room Specification. Useful for

- Tender process to reducing the risk – improve detailing.
- Engineering phase for detailing each room separately and coordinate with Client.

Database handles e.g.

- Indoor Climate Specification
- Electrical Outlets – Normal 1P, Normal 3P, UPS and Other
- Lighting – Basic and Special Armatures
- IT & AV Equipment and Outlets.
- Building Utilities – Wash Basins, Eye Wash, Radiators, Floor Heating, Curtains, Sun-screens, Sewage and Floor Drains etc.
- Supplies – Water, Gases, Cooling etc. for Labs.
- Interiors – LAF Bench, Point Suction etc. for e.g. Labs.
- Surfaces – Wall, Floors, Ceilings
- Safety – Ethanol, CO₂ alarms
- Fire Safety – Fire Detection, Room Classification, Fire Fighting Equipment

P-Engineering uses MS Access for User interface and Database engine can be Desktop or Server Solution
