

## Commissioning: DS 3090

### P-952

Commissioning support for the Contractors side according to DS3090. Delivery of the following Services

- Supervision – “Tilsyn”
- Test Paradigms – “Test Paradigmer”
- Test according to Danish Building Regulation BR18
- Commissioning – “Idriftsættelse”
- Coordination with 3<sup>rd</sup> party Commission Supervision CxL

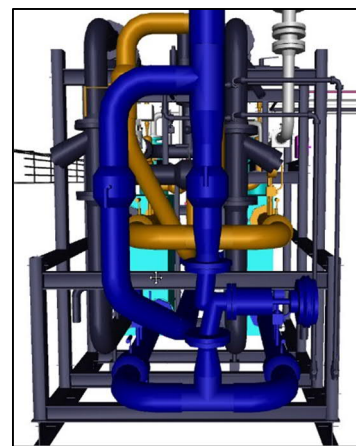

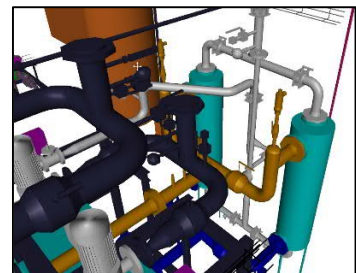

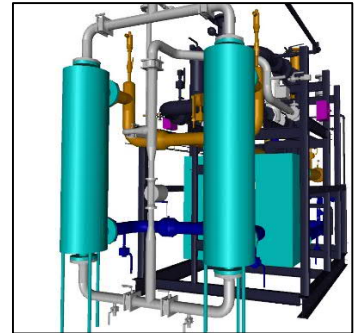

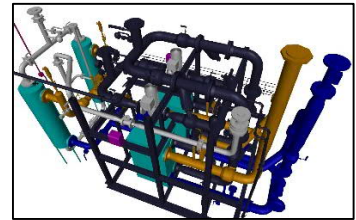

P-Engineering supports our clients throughout the whole DS3090 procedure from participating in generation of a Commissioning Plan suited for the project in question to getting the test done and approved by the CxL; and thereby securing you the necessary DGNB point.

Generation of suitable Test Paradigms is critical to on one side securing the correct function of the system in question and on the other side not getting it too complicated to execute.

Areas such as Sewage, Electrical, Heating, Cooling, Ventilation, Water, Weather Stations, Sun Blinds, Lifts & Elevators, Indoor Climate etc. are covered.
